Center Mission

The Center on Organization and Restructuring of Schools studies how organizational features of schools can be changed to increase the intellectual and social competence of students. The five-year program of research focuses on restructuring in four areas:

- The experiences of students in school.
- The professional life of teachers.
- The governance, management and leadership of schools.
- The coordination of community resources to better serve educationally disadvantaged students.

Through syntheses of previous research, analyses of existing data, and new empirical studies of education reform, the Center focuses on six critical issues for elementary, middle and high schools:

- How can schooling nurture authentic forms of student achievement?
- How can schooling enhance educational equity?
- How can decentralization and local empowerment be constructively developed?
- How can schools be transformed into communities of learning?
- How can change be approached through thoughtful dialogue and support rather than coercion and regulation?
- How can the focus on student outcomes be shaped to serve these five principles?

Center Publications

In the fall and spring of each year, the Center publishes an issue report which offers in-depth analysis of critical issues in school restructuring. *Issues in Restructuring Schools* is distributed free to all persons on the mailing list. In addition, three "briefs" targeted to special audiences are offered yearly. Our 1994 *Bibliography on School Restructuring* is distributed free on request; it will be updated again in 1995. To be placed on the mailing list, please contact Leon Lynn, Dissemination Coordinator, Center on Organization and Restructuring of Schools, University of Wisconsin, 1025 W.
